**Monuments in Danger!***They are beautiful, they are amazing, but they are in danger.*

1) \_\_\_\_\_ seas, melting ice and global  
 2) \_\_\_\_\_ threaten our cultural sites and  
 monuments. But just as we are responsible  
 3) \_\_\_\_\_ most of the damage, we also  
 have the 4) \_\_\_\_\_ to save them.

*What are we going to do?*

giant worship damaged pollution

**Stonehenge, Wiltshire, England**

Stonehenge is a 5,000-year-old circle of 5) \_\_\_\_\_

stones. Some people believe it was a place to

6) \_\_\_\_\_ the sun. Nobody knows what it really  
 was. 800,000 people visit it each year! Unfortunately, all these  
 visitors have 7) \_\_\_\_\_ the stones. Traffic  
 8) \_\_\_\_\_ also threatens the stones. Authorities  
 are going to try moving busy  
 roads and car parks further away  
 from the site. Will mystical  
 Stonehenge survive for the next 5,000 years?

**The Temples of Angkor Wat, Cambodia**

These temples were built in the early 12th century. The temples  
 are a national symbol of Cambodia. One of them appears on  
 Cambodia's flag. About 600,000 tourists visit them every year.

Wet, 9) \_\_\_\_\_ weather, vegetation and tourists  
 are all 10) \_\_\_\_\_ these soft-sandstone temples.  
 11) \_\_\_\_\_ are working hard to protect them.  
 Hopefully, this will help to 12) \_\_\_\_\_ Angkor  
 Wat for many more years.
