

PROGRAM SMART HOLIDAYS

CUTI PENGGAJAL 3

SMK (P) SRI AMAN

PETALING JAYA

Read the text below and answer questions 1 to 8.

Shopping Online

Billy wanted to get a laptop. His friend, Arvind had recently bought a laptop online. Not only was it cheaper than buying at a retail shop, it was also of good quality. Billy was unsure about getting it. He asked his older brother, Chris for advice. Chris told him that he had bought a camera online and was very satisfied with it. After listening to Chris, Billy decided to go ahead and buy his laptop online.

Firstly, Billy searched through a few online shopping platforms such as Lazada, Shopee, Lelong and others to get the best deal. After a few days of research, he finally decided to buy a laptop from a seller at Shopee. The price of the laptop was affordable and it had the features that he wanted. They were also giving either a mouse or a pendrive as a complimentary gift. Billy chose the former.

The price of the laptop was originally RM1,200 but since the shop was having a sale, Billy managed to get it at a discounted rate. He only had to pay RM840 for the laptop. Billy managed to save RM360. He felt very pleased. Billy used his father's credit card to pay for his laptop.

Billy ordered the laptop on 20 May. He was asked whether he wanted the laptop to be delivered by Go Delivery or Zoom Express. He chose the latter as it was slightly cheaper. Billy was then informed that he would get the laptop within a week. He waited patiently for his laptop to arrive. The laptop arrived on 26 May.

Billy thoroughly checked the laptop and was pleased that it was in good condition. In fact, shopping online was a more pleasant experience than he expected.

Complete the following table. Choose **no more than three words and/or number** from the text for each answer.

Shopping Online

Bought from	3
Payment method	4
Discounted price	5
Courier service	6
Free	7
Purchase date	8

Read the text below and correct the underlined errors.
For each question, write the correct word in the space provided.

A New Invention

Remya Jose from Kerala, India and her twin sister were fourteen years old when their mother fell ill. The girls (0) has no choice but to take over the task of washing the family's laundry at the river by hand as their house did not have electricity. It was not (1) a easy task. The girls tried to figure out ways to make their job easier. Then Remya thought of an alternative solution. She studied (2) why an electric washing machine could do. Remya then designed a mechanical one (3) who uses a pedal system connected to an aluminium drum by a standard bike chain. A local auto repair shop then helped her (4) of construct the washing machine by using old bicycle components. It only took (5) between 30 minutes for the washing machine to handle a load of laundry. In the beginning, only four to five minutes was required for actual pedalling (6) or a further four to five minutes at the end of the cycle to rinse. During the rest of the time, the clothes were (7) soak in soapy water. After that, the dirty water was drained out (8) under a faucet. This allowed space for new, clean water to go in before the last spin.
