A family tree represents the entire family structure according to the order of descent.

To do this we will look at the following example of a family and then you will recreate the family tree of your home.

Analyze how many people live in your house, if there are grandparents, if you have brothers or sisters, if you live with both parents, with your aunts and uncles or with some other family member.

- **Look at the following family tree and according to the family members that appear there you will drag and drop their names.**

grandfather	grandmother	cousin	cousin	sister

father	brother	mother	aunt	uncle	me
