

Marcy loves heer city, Glenview. A long time ago, it **is / was** a little village in the center of The United States. In the past, Glenview **had / has** only 3,000 citizens! People **live / lived** in small houses far away from each other.

But in the 1950s the village **become / became** popular for its wonderful living conditions: clean air, lots of nature and good houses. People from other towns **come / came** to live in Glenview and the city **grew / will grow** a lot.

Nowadays, the city **is / was** bigger and it **had / has** almost 35,000 citizens. People still **wanted / want** to keep the city clean and eco-friendly, so they **walk / walked** to work or they **ride / rode** their bicycles everyday.

If they don't contaminate the city, it **be / will be** the cleanest city in the year 2025. Next month, a recycling program **will start / started** to help people reduce their carbon footprint. Marcy **tells / will tell** her classmates about this program in tomorrow's Science class.
