Match each statement with the correct step in the tabe:

Ali thinks that the reason is that the ocean is made of saltwater while the pond is made of freshwater.	Ali fills two cups with one type of water and puts them in the freezer.
Ali finds out that saltwater has lower freezing points than fresh.	One winter day, Ali noticed that the pond tends to freeze over at higher temperatures and sooner than the ocean.

Observation	**Hypothesis**
Experiment	**Theory**
