

Exercise 3

Read the information. Then listen and choose if the statements are True or False.

After you know what to listen for, be careful! The speaker may mention several things which might be correct, but there is only one correct answer. For example, for Question 1, you need to listen for a place where goods can be transported. Even though the speaker mentions more than one type of place, you need to choose the one that relates to the question.

1. Before railways were built, people transported goods by road.
 - True
 - False
2. Railways were used to transport products such as milk, wood and coal.
 - True
 - False
