

RESOLUCIÓN DE ECUACIONES: CUADRADOS DENTRO DE UN RECTÁNGULO.

Calcula la expresión algebraica correspondiente al LADO DE CADA UNO DE LOS CUADRADOS:

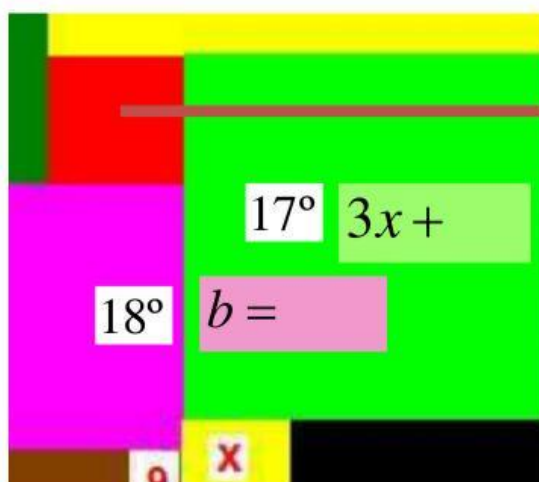

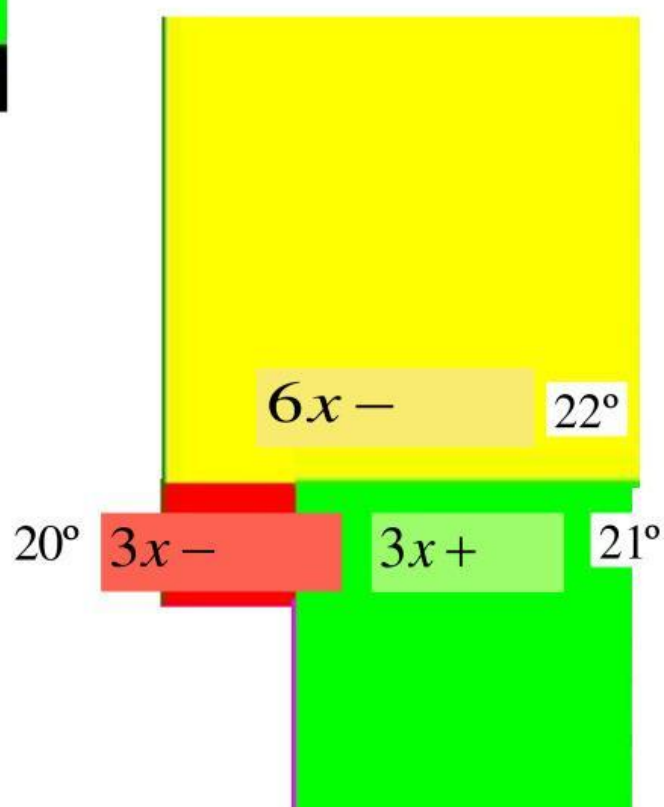

$$a = x - 13^\circ$$

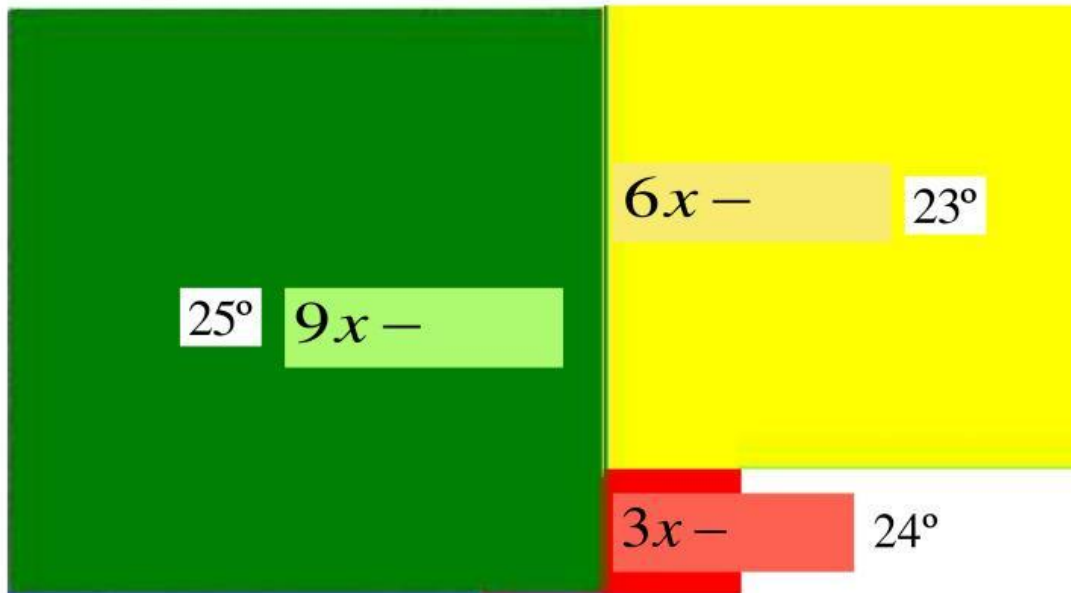

$$b = x + 16^\circ - (x - 9) =$$

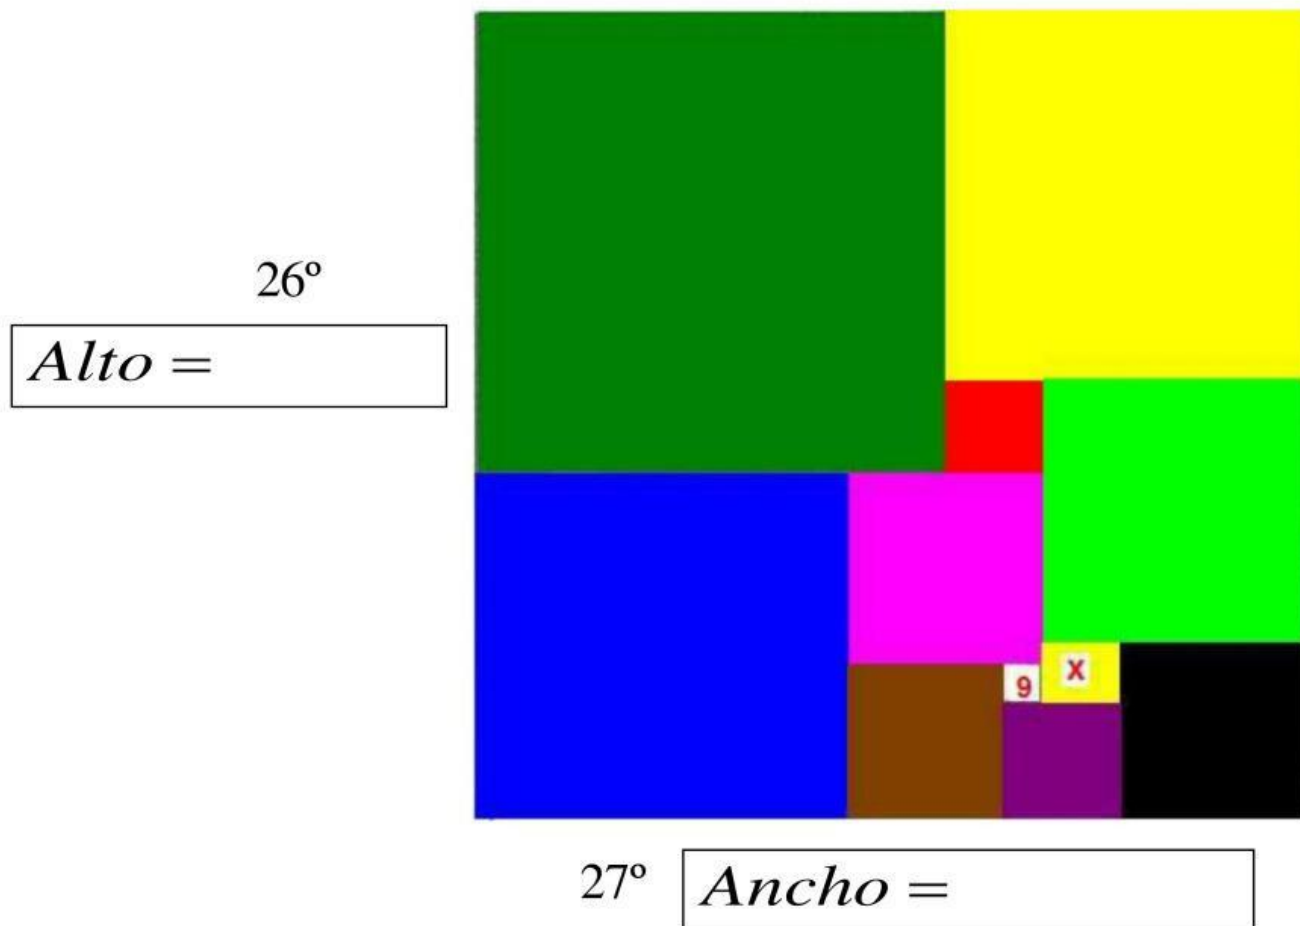

$$3x + 19^\circ - = 3x -$$

Calcula ahora las dimensiones del rectángulo completo:

¿Para qué valor de x el rectángulo se convierte en CUADRADO?

$x =$
 28°
