

## I

## LISTENING COMPREHENSION

  You will hear a story about Jonathan. He is a ranger (looks after the countryside).

For questions 1–7, write T (if the statement is true), F (if it is false) and U (if it is unstated).

- 1) \_\_\_\_ Jonathon has visited 12 parks.
- 2) \_\_\_\_ He was happy to meet an animal in Great Smoky Mountains National Park.
- 3) \_\_\_\_ He saw a mother bear in Yellowstone National Park.
- 4) \_\_\_\_ Jonathon swam in the rivers or lakes of the parks.
- 5) \_\_\_\_ In his favourite park, Jonathon travelled with his parents.
- 6) \_\_\_\_ His favourite park is Yellowstone.
- 7) \_\_\_\_ Jonathon likes to share what he learned about the parks with other people.

2. Прочитайте текст и соотнесите пронумерованные абзацы 1 - 5 и заголовки A - F. Один заголовок в списке лишний.

## Water

- |                                    |                                  |
|------------------------------------|----------------------------------|
| A) Time to understand the problem. | D) Saving water at home.         |
| B) Making laws for factories.      | E) Water shortages in the world. |
| C) Bad ideas for the future.       | F) Using water every day.        |

1.

Imagine a world with no drinking water, and no water to wash or cook with. It's hard to imagine this, because we use water every day without even thinking about it. We all need water - not just for our homes and factories but to survive.

2.

Yet there are terrible water shortages all over the world. In parts of Africa and China, for example, many people don't even have clean water to drink. In fact, over half of the people in the world have to live with water shortages every day. Fortunately, there are things that we can all do to save water.

3.

The solution begins at home. We can save the water from our baths and use it for the garden, instead of wasting hundreds of litres of clean water on our lawns and plants. This would help to save many litres of water every day, especially in the summer.

4.

Governments can help by passing laws to stop factories from wasting and polluting water. If factories recycle water and stop pouring chemicals into our lakes and rivers, there will be a lot more clean water around.

5.

All in all, there are many things, we can do to save our planet's disappearing water supplies. The time has come to start understanding the value of water, before a world without clean water becomes a terrible reality.
