Charitable cause - 'tʃærɪtəb(ə)l kɔ:z

Mainstream - 'meɪnstri:m

Foundation - 'faʊn'deɪʃ(ə)n

4. Reading

It was a sunny afternoon in the **bustling** city of San Francisco when John first heard about bitcoins. He was having lunch with a group of his **tech-savvy** friends when the topic of cryptocurrency came up.

"Have you heard about this new thing called bitcoins?" one of them asked. "It's a digital currency that's completely decentralized and secure. No government or financial institution controls it."

John was intrigued. He had always been interested in finance and technology, and the idea of a completely decentralized currency seemed like the future of money. He decided to do some research on his own and soon became completely absorbed in the world of bitcoins.

As he learned more about the technology behind bitcoins, John became convinced that it was the future of money. He started investing in it and even convinced some of his friends to do the same.

But not everyone was as optimistic about the future of bitcoins. Some financial experts **warned** that it was a risky investment, and there were even stories of people losing their entire savings after investing in bitcoins.

Despite these warnings, John remained confident in his investment. And as it **turned out**, he was right. The value of bitcoins soared, and John **made a fortune**.

But with great success comes great responsibility. John knew that he had a unique opportunity to use his wealth for good. He started using his bitcoins to fund charitable causes and even started his own foundation to help those **in need**.

As the years passed, the use of bitcoins became more mainstream, and it became clear that it was here to stay. John continued to be a **vocal advocate** for the power of cryptocurrency and used his wealth to make a positive impact on the world.

And in the end, that was the true value of bitcoins for John – not just the financial gain, but the opportunity to use his success for something greater.

Legend

1. Bustling - full of activity and noise
