

LISTENING PRACTICE DICTATION LIVE 01

FULLNAME: _____ CLASS: _____

You will hear Maria talking to her friend Alex about visiting a science museum.

- Alex: Hi, Maria, I _____ you since Tom's party on Sunday.
- Maria: Hi, Alex, it's only Tuesday today! I went on _____ to the Science Museum yesterday.
- Alex: I didn't know it was open on Monday! I've already been there _____ with my aunt and uncle, it's _____. But I'd really like to go with my class or a group of friends.
- Maria: Oh... right.
- Alex: How did you get there? It's a bit far to _____, isn't it?
- Maria: We _____.
- Alex: Lucky you! We usually cycle there – it's good exercise. What did you like best at the museum?
- Maria: The museum guide showed us _____, but it wasn't the film that we saw about space travel.
- Alex: Did you go to the café? They do great chocolate cake!
- Maria: I know, I _____ their cakes and ice creams looked great, but we had to hurry, so I just _____. I'd really like to go there again.

Listen again and complete the sentences

II. Listen and complete:

Where do the bubbles come from when you boil water?

Water is a _____. When it is heated, it moves around faster and faster. When it starts to boil, the liquid turns into a gas. This gas is called water vapor. This gas is _____ the water around it. It rises to the top. Then it disappears _____.

As the water gets hotter and hotter, it starts turning into gas _____. A lot of bubbles form at the same time. All these bubbles try to escape _____. The bubbles push the water out of the way and _____. This is what we call "boiling water." More and more water turns into gas. More of it disappears into the air. After a while, every _____ will be gone. Try it and see!
