

## SISTEMAS DE ECUACIONES LINEALES

Escriba la solución para cada uno de los siguientes sistemas de ecuaciones.

$$\begin{aligned}4x - y &= 2 \\ -x + 6y &= 11\end{aligned}$$

$$\begin{aligned}x &= \boxed{\phantom{000}} \\ y &= \boxed{\phantom{000}}\end{aligned}$$

$$\begin{aligned}2x + y &= 12 \\ 5x - 2y &= 3\end{aligned}$$

$$\begin{aligned}x &= \boxed{\phantom{000}} \\ y &= \boxed{\phantom{000}}\end{aligned}$$

$$\begin{aligned}x + y &= -1 \\ 2x + y &= 8\end{aligned}$$

$$\begin{aligned}x &= \boxed{\phantom{000}} \\ y &= \boxed{\phantom{000}}\end{aligned}$$

$$\begin{aligned}2x + y &= -11 \\ x + 3y &= -18\end{aligned}$$

$$\begin{aligned}x &= \boxed{\phantom{000}} \\ y &= \boxed{\phantom{000}}\end{aligned}$$

$$\begin{aligned}6x + 4y &= 28 \\ x + y &= 4\end{aligned}$$

$$\begin{aligned}x &= \boxed{\phantom{000}} \\ y &= \boxed{\phantom{000}}\end{aligned}$$
