CORNEA

Covers and protects the iris and pupil •

RETINA

**300** GAP FILLING. How do we hear? Choose the right word to complete the text:

BRAIN SMALL BONES AUDITORY NERVE

COCHLEA

EARDRUM

NERVE IMPULSES

Sound waves go into our ear and hit the

. When the eardrum vibrates it

makes the

inside the ear vibrate too. The

. The

transmits these

detects the

vibrations and produces

impulses to the brain. Then, the interprets the information.

## Uo- MINGI SENSE? Identify these senses:

- ☆ This sense detects aromas and chemicals in the air.
- ☆ This sense can detect different flavours.
- ☆ This sense can detect temperature, texture, pressure and pain.
