Match the numbers to what they represent.	
25	tons of carbon dioxide grabbed from the atmosphere by a single whale
37	the value of a whale in dollars
33	the current number of elephants in Gabon
1,500	the value of the seagrass carbon sequestration service in dollars
3 million	the length of the speaker's boat in feet
2.6 million	the potential number of elephants in Gabon
2.3 trillion	the number of trees that would grab the same amount of CO2 as a whale
57,000	gigatons of carbon dioxide grabbed from the atmosphere by phyto
195,000	the value of an elephant in dollars
