

Saving water (English conversation lesson)

Did you know???

One European person uses on average 143 litres a day each
- and a lot of that goes down the plug hole!

Watch the video:

What does it say to us?

1, complete the sentences with much/ many and then answer:

How water do you use a day?

How glasses of fresh water do you drink a day?

How oceans are there on our Earth?

How water from all water sources on Earth is in the oceans?

Result: Only 3% of all water on Earth is drinkable and only 3% of this water we can be used by humans, the rest is in glaciers or out of the reach of humans. Many sources of water are being polluted (dirty) by humans these days.

Wht does it mean to us?

2, There are some ways how you can save water at home. Look at the pictures and match them with correct words:

A, stopping water tap when brushing your teeth

B, using rain water in the garden

C, repairing dripping taps

D, having shower instead of bath

E, using dishwasher (full if possible)

3, Give some tips how you personally can save water !
