3 Choose the correct option.

In geography, a desert is an area which receives **few / little** rain. **Many / much** polar regions can be called deserts, but most of us think of a desert as being a sandy, rocky area with **not enough / few** water. **Much / A lot** of deserts consist of sand dunes or bare rock, and **many / much** are near mountain ranges. Others are far away from the sea, so receive **few / little** moisture. It seems strange, but in fact there are **a lot / many** of plants, animals and insects in these regions. Some desert animals live underground. They spend **little / few** time in the sun and only come out at night. Some snakes and lizards need to spend **much / many** hours in the sun to generate body heat, so they have **few / little** difficulty living in high temperature.
