UNIT 3. REPRODUCTION
MALE REPRODUCTIVE SYSTEM

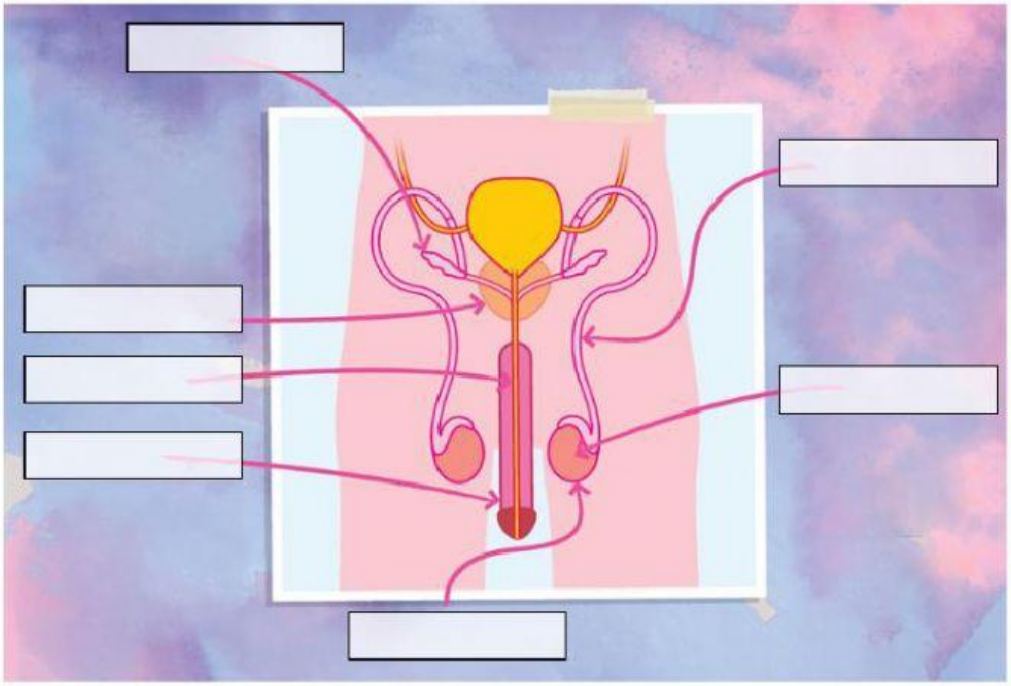

1. Match the male reproductive organs to the descriptions.

testicles	●	● These produce and store millions of sperm sex cells.
penis	●	● This contains the urethra, a long tube through which sperm travel out of the body
scrotum	●	● Two tubes that carry sperm toward the penis.
vas deferens	●	● A bag of skin that surrounds the two testicles.
prostate gland and seminal vesicles	●	● These produce semen, a liquid which helps sperm move and gives them nutrients.

2. Label the diagram of the male reproductive system.

scrotum prostate gland seminal vesicles urethra testicles

penis vas deferens
