

## UNIT 3. REPRODUCTION

### MALE REPRODUCTIVE SYSTEM

1. Match the male reproductive organs to the descriptions.

testicles	●	●	These produce and store millions of sperm sex cells.
penis	●	●	This contains the urethra, a long tube through which sperm travel out of the body
scrotum	●	●	Two tubes that carry sperm toward the penis.
vas deferens	●	●	A bag of skin that surrounds the two testicles.
prostate gland and seminal vesicles	●	●	These produce semen, a liquid which helps sperm move and gives them nutrients.

2. Label the diagram of the male reproductive system.

scrotum    prostate gland    seminal vesicles    urethra    testicles

penis    vas deferens
