

Resuelve la ecuación.

$$2x - 5 + 3x = -20$$

$$\square \square \square = \square \square \square$$

$$\square = \square$$

$$\square = \frac{\square}{\square}$$

$$\square = \square$$

Verifica

$$2\square - 5 + 3\square = -20$$

$$\square - 5 + \square = -20$$

$$\square = -20$$
