

- 1) **Watch the video and drag the words into the correct spaces in the text.** (Mira el video y arrastra las palabras al espacio correcto en el texto) → Se aconseja buscar las palabras desconocidas en un diccionario (<https://www.wordreference.com/>) antes de comenzar la actividad.

Workshops - England - transport - James Watt - factories - trains - 1780 - 18th - steam engine - 1850

The Industrial Revolution is the stage of history that goes from \_\_\_\_\_ to \_\_\_\_\_ and began in \_\_\_\_\_. For almost the entire history of mankind, life had been based on agriculture and livestock. At the end of the \_\_\_\_\_ century, the Englishman \_\_\_\_\_ invented, or rather perfected, the \_\_\_\_\_. Until then the artisans had been dedicated to the manufacturing of utensils with their own hands in small \_\_\_\_\_, but with the arrival of the steam engine, that changed forever. This machine used the energy of steam to transform it into power and moving other machines. These new machines were applied to the industry and began to do the work that the artisans used to do, so the small artisan workshops were disappearing giving way to the big \_\_\_\_\_. The steam engine was also used for \_\_\_\_\_ and the first trains and steam boats were manufactured, which facilitated trade and travel between cities and countries. Europe was filled with \_\_\_\_\_.
