Activity 3

Theory

Noor is learning about bias and accessibility issues in technology.

Evaluate the severity of bias and accessibility issues in technology then explain your choices.

Write your answers below.

	Impact	Severity (Low/High)	Explanation
Bias			
Language	Some devices have controls in one language. Usually, the language is appropriate for the region they are sold.		
Physical	Some devices are produced for right-handed users. Approximately 9% of people in the world are left-handed.		
Accessibility issues			
Cost	Approximately 40% of people in the world do not have internet access.		
Education	Approximately 14% of people worldwide do not have access to education.		
User abilities	Approximately 15% of people worldwide have some form of disability or impairment.
