D. Kevin Davis returns for a new series, Lost in the Future. In this science fiction show, he plays the role of a crazy scientist who takes a time machine to the year 2250. The Earth is dying from pollution. Can the scientist save the world?

Look at the sentences below about sea turtles. Read the text to decide if each sentence is correct or incorrect. If it is correct, choose TRUE. If it is not correct, choose FALSE. (5 questions)

IN DANGER – SEA TURTLES MAY DISAPPEAR

Sea turtles are in real danger. Climate change will affect sea turtles in many ways. Warmer temperatures will affect sea turtle eggs. Warm seas cause more female turtles to be born than males. In addition, the habitat of sea turtles is getting smaller. Climate change will cause ice to melt and sea levels will rise. Therefore, it will destroy the habitats of sea turtles on the beaches. Their nests are also being affected by humans on beaches. With the seas getting warmer, sea turtles won't have enough food to eat because other sea life will die. There might not be any more sea turtles in the future if people don't find solutions to this problem.

Answers	True	False
17. Climate change won't affect sea turtles.	<input type="radio"/>	<input type="radio"/>
18. Warm temperatures will sea turtle eggs.	<input type="radio"/>	<input type="radio"/>
19. The habitat of sea turtles will get smaller.	<input type="radio"/>	<input type="radio"/>
20. The nests of sea turtles will only be destroyed by climate change.	<input type="radio"/>	<input type="radio"/>
21. Although other sea life will die, sea turtles will still have enough food to eat.	<input type="radio"/>	<input type="radio"/>
