# What a cool gadget!

1. **Look at the title of a video you are going to watch. Say if you think you would want the camera. Explain why/why not.**

> *The World's First Flying Indoor Security Camera for Your Home*

2. **Watch the video [https://youtu.be/Kk4HOGa257k] and see if you change your mind.**

3. **Try to answer customer questions about the camera. Then, watch the video again and check your answers.**
   a) How will the camera know where the rooms are?
   b) What can I use the camera for?
   c) Will the camera fly when I'm home?

**4. Look at the pictures and discuss how these objects could be changed to become smart gadgets.**

mug

mirror

bike

alarm clock

projector

**5.** Read about the gadgets and decide which one would be the most useful for you and why.

a) Light clock It's an alarm clock which doesn't use an alarm sound but slowly makes your room lighter. It's like waking up to a sunrise.

b) Folding electric bike Do you sometimes need to fit your electric bike into a car or get on a bus with it? A folding electric bike will make your life easier!

c) Smart mug It will let you know when your tea is ready (and when you need to take the teabag out) and will keep your drinks hot for as long as you want.

d) Fitness mirror This mirror plays fitness classes. It can also connect you to your personal trainers in real time. The mirror is a 32-inch HD touchscreen and it includes speakers.

e) Pocket projector Have a presentation at work? Want to watch a film? Take the pocket projector wherever you want. Speakers are included.

**6.** Look at the gadgets again and decide which gadget would you choose for each of the situations below:

- Choose a birthday present for your friend who likes sport and the outdoors.
- You run an IT company. Choose a gadget you will get for all your employees.
- Decide which gadget has probably made its creators most money.
- Put the gadgets in order from the most to the least original.
