THE CAUSATIVE Barbershop Riddle

This week, the four barbers working at "The Barberians" have appointments on different days, with different clients and for different services. Using the clues and the grid below, match each barber to the client, the day, and the service of the appointment and complete the barbershop's planner. No option in any category is used more than once. In the grid drag & drop a √ to mark a box as "yes" and select it (by clicking on it) to mark it as "no".

CLUES

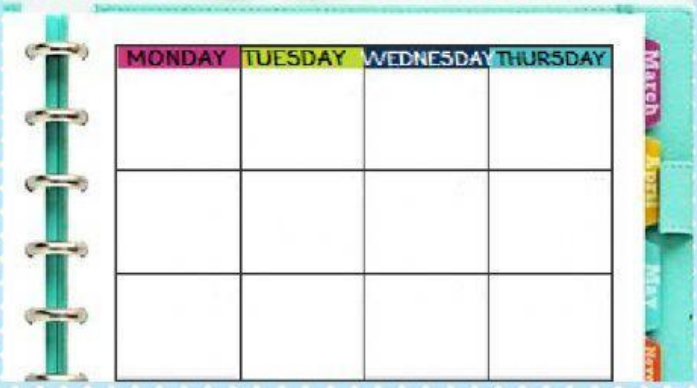

1) Mr Brown's appointment is earlier in the week than Luke's appointment.
2) The Monday appointment is not for a haircut.
3) The haircut is either the Thursday appointment or for Grant's client.
4) Mark either has Mr Cooper as his client or the Tuesday appointment.
5) Luke's appointment is 2 days before the moustache trim.
6) Of Luke and Mr Smith, one has an appointment on Wednesday and the other an appointment for beard care.

Not sure how to solve the riddle? Click here for instructions on solving logic puzzles with a grid.

		BARBERS				SERVICES				CLIENTS			
		Grant	Harry	Luke	Mark	beard	hair	moustache	shave	Mr Brown	Mr Cooper	Mr Jones	Mr Smith
DAYS	Monday												
	Tuesday												
	Wednesday												
	Thursday												
CLIENTS	Mr Brown												
	Mr Cooper												
	Mr Jones												
	Mr Smith												
SERVICES	beard												
	hair												
	moustache												
	shave												

Assuming that today is Wednesday and that Mr Jones always has the same weekly appointment, use the information in the planner to write Active Voice sentences in the Present Continuous, the Present Simple, the Past Simple and the Future Simple:

.....on Monday.
.....on Tuesday.
.....today.
.....on Thursday.

Now write these sentences using the causative:

.....on Monday.
.....on Tuesday.
.....today.
.....on Thursday.
