**It is given to people for free**
8. Who do we buy food from? **The farmers**  
**The shopkeepers**

# Where does food come from?

Think and remember. Complete the text.

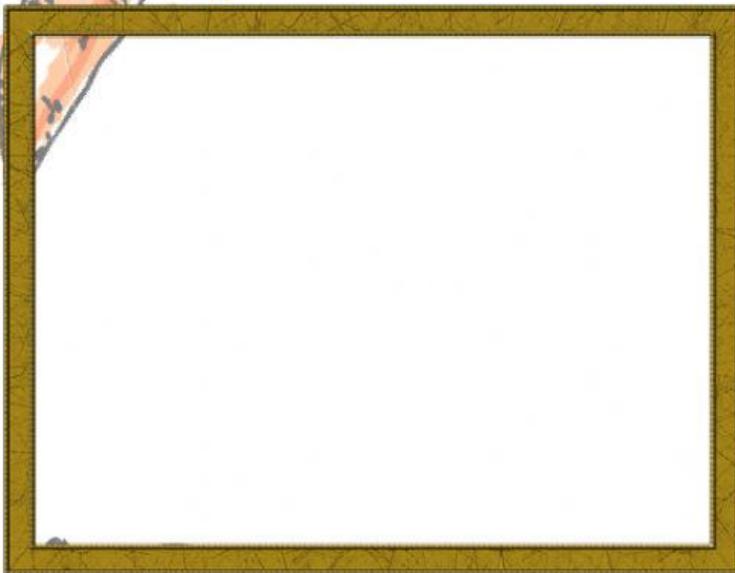

Farming is the process of growing plants / growing minerals.

Farming is the most / least important industry in the world because it produces some of our food / all of our food.

All / some living things need food to live.

To grow food, we need rays from the sun / the moon and minerals from the soil / the water.
