

Convertir fracciones impropias en números mixtos

Fracción

$$\frac{14}{3}$$

$$14 \begin{array}{l} 3 \\ 2 \end{array} \begin{array}{l} 4 \\ 4 \end{array}$$

Número mixto

$$4 \frac{2}{3}$$

El denominador **NO CAMBIA**

$$\frac{14}{5} = \quad \text{—}$$

$$\frac{62}{9} = \quad \text{—}$$

$$\frac{17}{3} = \quad \text{—}$$

$$\frac{33}{7} = \quad \text{—}$$

$$\frac{7}{4} = \quad \text{—}$$

$$\frac{77}{8} = \quad \text{—}$$

$$\frac{51}{8} = \quad \text{—}$$

$$\frac{28}{5} = \quad \text{—}$$

$$\frac{61}{7} = \quad \text{—}$$

$$\frac{31}{9} = \quad \text{—}$$

$$\frac{29}{6} = \quad \text{—}$$

$$\frac{17}{2} = \quad \text{—}$$
