

# Poliedros: prismas

1 Relaciona correctamente los desarrollos planos con los prismas.

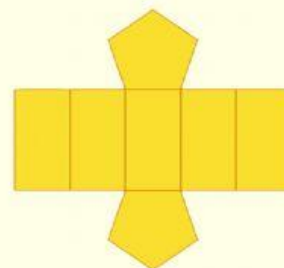

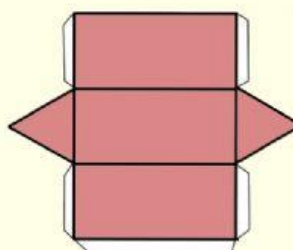

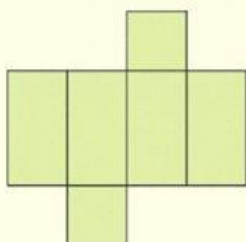

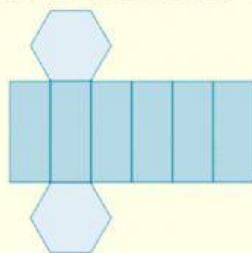

Prisma  
cuadrangular

Prisma  
triangular

Prisma  
hexagonal

Prisma  
pentagonal

2 Marca las bases de estos prismas.

3 ¿Qué diferencias encuentras entre estos dos cuerpos? Completa la tabla.

|                                 |  |  |
|---------------------------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Nº de bases                     |                                                                                     |                                                                                       |
| Polígono de la base             |                                                                                     |                                                                                       |
| Polígono de las caras laterales |                                                                                     |                                                                                       |
| Nº de vértices                  |                                                                                     |                                                                                       |
