

PENGUINS

Penguins love ice and they love the sea. You never see a penguin sunbathing!

Penguins live in the Southern Hemisphere. You can find them on

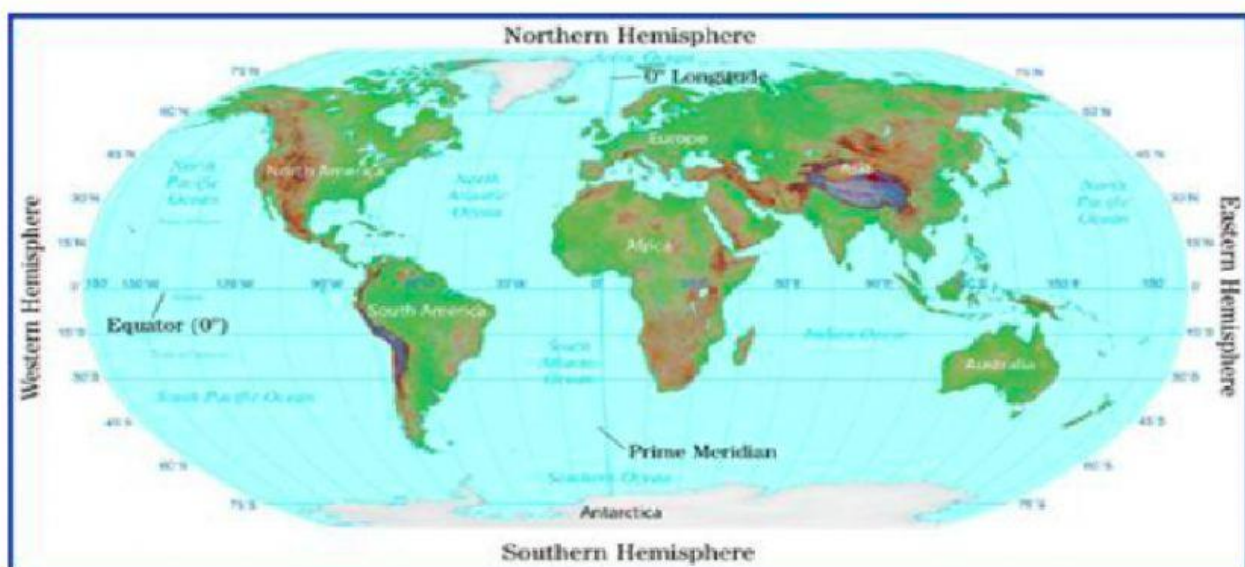

the beaches of Antarctica. Antarctica is a very big island covered in ice. Penguins also live in the south of Australia, New Zealand, America and Africa.

There is ice in Canada and the Arctic. But penguins don't live in the Northern Hemisphere.

Antarctica is too cold for people, but perfect for penguins.

01

Penguins live in

- ☐ Antarctica.
- ☐ the Arctic and Canada.
- ☐ America and Canada.
- ☐ New Zealand and the Arctic

02

Penguins only live in

- ☐ the North.
