

Osserva le figure geometriche ed esegui le operazioni per calcolare le frazioni equivalenti a quelle date.

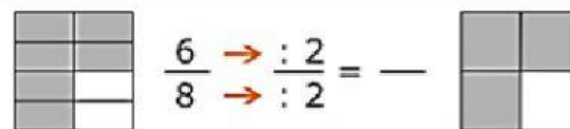

La frazione $\frac{2}{4}$ è equivalente a $\frac{4}{8}$...

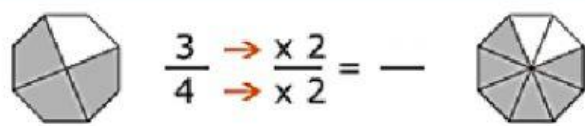

La frazione $\frac{12}{16}$ è equivalente a $\frac{3}{4}$...

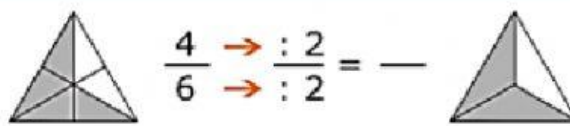

La frazione $\frac{1}{2}$ è equivalente a

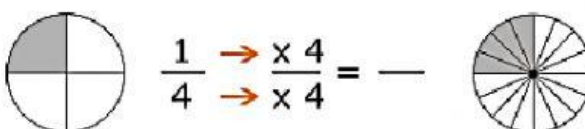

La frazione $\frac{6}{8}$ è equivalente a

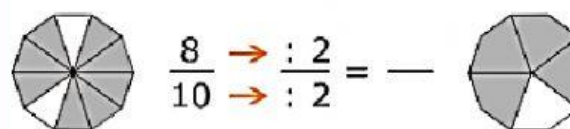

La frazione $\frac{3}{4}$ è equivalente a

La frazione $\frac{4}{6}$ è equivalente a

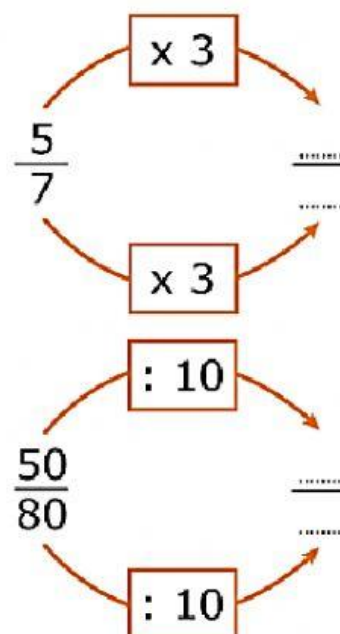

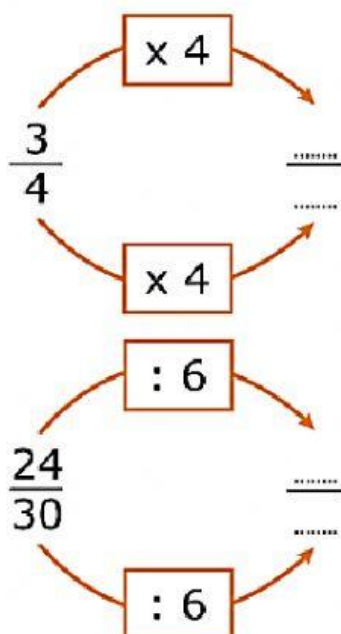

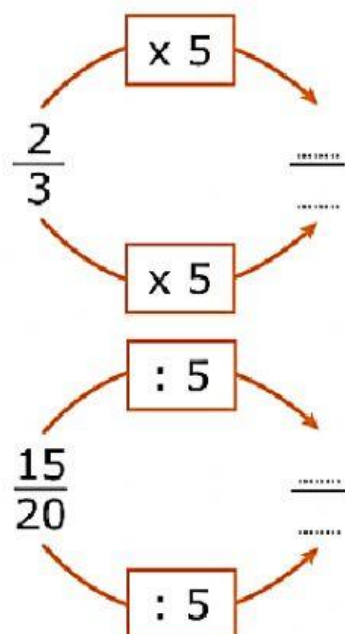

La frazione $\frac{1}{4}$ è equivalente a

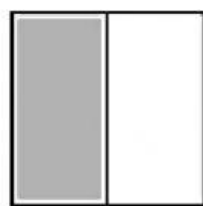

La frazione $\frac{8}{10}$ è equivalente a

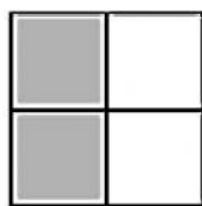

Applica la proprietà invariantiva e scopri le frazioni equivalenti.

Nella seconda figura, scrivi le frazioni, come nel primo esempio.

$$\frac{1}{2}$$

$$\frac{2}{4}$$
