

Use the adjectives given in parentheses to make sentences comparing the planets as in the example.

e.g. Uranus (big) Neptune.
Uranus is *bigger than* Neptune.
Jupiter (big) all the planets.
Jupiter is *the biggest* planet of all (the planets).

1. Mercury is …… (small) planet in the Solar System.
2. Lasting less than ten Earth hours, the planet with ……...

   (short) day is Jupiter.
3. Venus is …… (hot) than Earth as it is closer to the Sun.
4. Saturn is ……(big) than Earth, but Jupiter

   is…… (big) planet in the Solar System.
5. Mars is …… (close) to Earth than Uranus.
6. Neptune is ……(far) planet from the Sun.
7. With no rain or humidity, …… (dry) planet is

   Venus.
8. With violent weather occurring regularly, the planet with

   …… (frequent) storms is Neptune.
