Climate is the characteristic state of the ..... in a specific area over a long period of time. The elements involved in climate are ..... and ..... .

Look at the maps and label the climates indicated.

Read the text below and circle the correct words.

The Islas Canarias have many endemic / occasional species of plants. Vegetation varies depending on humidity and altitude / distance from the sea. In low-altitude areas, there are palm trees and laurisilva forests / spurges. In medium-altitude areas, there are Teide violets / laurisilva forests. In high areas, there are palm trees / Teide violets.
