6 Write a word from the box in each gap.

first ■ former ■ latter ■ making ■ more ■ on ■ one ■ otherwise  
■ since ■ so ■ such ■ them ■ though ■ which ■ whose

## Michael Pollan's Cooked

Every few months it seems, a new diet craze sweeps the western world. Whether (1) \_\_\_\_\_ a diet is low-fat, low-carb, no-carb or something else, one thing is for sure; none of (2) \_\_\_\_\_ work. If they did, everyone would be healthy and thin by now, (3) \_\_\_\_\_ clearly isn't the case.

Enter Michael Pollan, (4) \_\_\_\_\_ book, *In Defense of Food: An Eater's Manifesto*, out through all the chatter a few years ago. In that book were seven precious words of advice: 'Eat food. Not too much. Mostly plants.' Now, with his new (5) \_\_\_\_\_, *Cooked*, his slogan has gained three (6) \_\_\_\_\_: cook it yourself. In the (7) \_\_\_\_\_ book, he complained about the increasingly synthetic nature of food; in the (8) \_\_\_\_\_, he wants

us to understand that a meal is more than the sum of its parts. In (9) \_\_\_\_\_ a loaf of bread, a sauce, a meal, we are solving many of society's problems – nutritional or (10) \_\_\_\_\_ – in one stroke. (11) \_\_\_\_\_, we are choosing what goes into our food, instead of a food scientist in a lab doing (12) \_\_\_\_\_. Next, we are increasing the quality of what goes in, (13) \_\_\_\_\_ we're unlikely to get the cheapest ingredients and jazz them up with sugar, salt and so (14) \_\_\_\_\_. Thirdly, we're in control of our food choices and can buy local, fair trade or even grow it in our gardens.

The rise of obesity and diabetes in the west has been linked with convenience foods by many experts. (15) \_\_\_\_\_ it sounds paradoxical, we started to put on weight the minute we stopped cooking.
