

**Multiplica e identifica los términos de cada multiplicación.**

a)  $\boxed{9} \times \boxed{3} = \boxed{\phantom{00}}$

The diagram shows the multiplication  $9 \times 3 =$  followed by a box for the result. A green bracket is placed under the numbers 9 and 3, with a vertical line extending down to a blue rectangular box. Another green bracket is placed under the equals sign and the result box, with a vertical line extending down to another blue rectangular box.

b)  $\boxed{10} \times \boxed{8} = \boxed{\phantom{00}}$

The diagram shows the multiplication  $10 \times 8 =$  followed by a box for the result. A green bracket is placed under the numbers 10 and 8, with a vertical line extending down to a blue rectangular box. Another green bracket is placed under the equals sign and the result box, with a vertical line extending down to another blue rectangular box.

c)  $\boxed{7} \times \boxed{5} = \boxed{\phantom{00}}$

The diagram shows the multiplication  $7 \times 5 =$  followed by a box for the result. A green bracket is placed under the numbers 7 and 5, with a vertical line extending down to a blue rectangular box. Another green bracket is placed under the equals sign and the result box, with a vertical line extending down to another blue rectangular box.

d)  $\boxed{6} \times \boxed{2} = \boxed{\phantom{00}}$

The diagram shows the multiplication  $6 \times 2 =$  followed by a box for the result. A green bracket is placed under the numbers 6 and 2, with a vertical line extending down to a blue rectangular box. Another green bracket is placed under the equals sign and the result box, with a vertical line extending down to another blue rectangular box.
