examine | investigate | catch | weapon | footprints  
evidence

## **Murder Investigation**

It takes a lot of work to <sup>1</sup>.....  
a murder. First, detectives have to document  
everything in the area of the crime – from  
the furniture in the room to the aromas in the  
air. At the same time, they talk to people  
and look for <sup>2</sup>....., such as  
fingerprints and <sup>3</sup>..... . They  
also look for the murder <sup>4</sup>..... .  
Then, forensic scientists <sup>5</sup>.....  
these things in a crime laboratory. DNA on  
the items is very important in helping to  
solve a murder and <sup>6</sup>.....  
the criminal.
