Selecting Appropriate Measurement Tools

2.MD.A.1: Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.

Measurement Tools: Label each tool. Color the measurement tools that measure length.

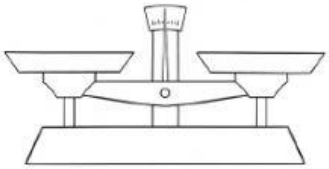

When Measuring:

1. Notice the unit you are using. Are you measuring in centimeters? Inches? Yards? Meters?

2. If you are measuring length, be sure to line up the tool at 0. Not all length tools start at 0.
