

One day, Mr. Smith's wife woke up with the flu. He decided to stay home from work to take care of her. While he was at home, he noticed that his neighbor's parcel was delivered to his house by mistake. He went to return it but when he came back, he saw a thief running away from his house! The thief had taken his wife's jewelry and some money. Mr. Smith immediately called the police and told them what happened.

The police arrived quickly and started to investigate. They found some footprints outside Mr. Smith's house and followed them. They also found a broken window that needed repair. The police asked Mr. Smith if he saw or heard anything strange before the thief disappeared. But he didn't know anything else.

After a few days, the police solved the case. They found out that the thief was someone who lived in the neighborhood. He was caught because he tried to sell the stolen jewelry. Mr. Smith was happy to get his wife's jewelry back. The thief was sent to jail for stealing.

Check out your True/False statements:
