6 For each question, choose the correct answer.

The night sky

The night sky can be incredible. The most obvious thing is the moon which, when full, can be very (1) _____ and light up the sky. If we're lucky, we can also see planets such as Mercury, Venus, Mars and Jupiter, although it (2) _____ on the time of year of course.

Another amazing (3) _____ is the stars. These can be (4) _____ to see if we're in the middle of a town or city. However, away from city lights, we might see hundreds or even thousands of them. If we have a (5) _____ enough telescope, we can get a really close look at them, too. It's (6) _____ to think that the stars we see on Earth have actually died. I don't really understand the science, but apparently, because of the speed of light, we're actually looking into the past. I think that's pretty awesome.

1 A fair	B mild	C bright	D sunny
2 A relies	B depends	C focuses	D decides
3 A show	B scenery	C display	D sight
4 A difficult	B sure	C open	D confused
