

Name:

science for kids!

Surname:

Grade:

## HUMAN BODY SENSE:

Welcome to the "Senses Game"! In this game, you will have the opportunity to name the different senses that humans use to experience the world around them.

There are five senses that we use to gather information about our environment: sight, hearing, touch, taste, and smell. Your task is to name each sense and provide an example of how we use that sense in our daily lives.

CHOOSE THE CORRECT ANSWERE:

SIGHT

TASTE

HEARING

TOUCH

SMELL
