*2.1 Listen to the conversation between the advisor and trainee, and answer the questions*

1: What this industry is all about?

---

2: What is the meaning of "Fresher" according to the audio?

---

3: What major B has just graduated from?

---

4: What are the main focuses of the work?

---

5: Is Kim a good advisor in your opinion?

---

2 Read the given conversation and answer the questions

Kim: I hope you understand what I've taught. It's been 6 years since you are a trainee. I think you are ready to take a role of an advisor.

Beth: Is there a newcomer in our department?

Kim: Yes, and he graduated in the electric vehicle. His educational background is quite impressive. You should see it for yourself.

Beth: Hmm, Jack Marston, graduated in an electric vehicle with A in most subjects, has experience in making EV conversions, and has been to Sweden for EV research. He is truly impressive as you said.

Kim: What do you think? Will you accept his application or .....?

Beth: Surely, I'll accept his application. His skills are valuable for our industry. With him working with us, I'm sure we will be able to make a new and eco-friendly innovative car for a better world for everyone.
