

English for children

Write the name of each geometric shape according to its characteristic.

It doesn't have angles equal, and no sides of equal length.

It has one right angle equal to 90°

.....

.....

It has two pairs of opposite sides equal in length and interior angles are at the right angles.

It has 2 angles equal and 2 sides of equal length and one line of symmetry.

.....

.....

It is a quadrilateral with two pairs of parallel sides and opposite angles are equal in measure.

It has all angles equal to 60° and all sides equal length and 3 lines of symmetry.

.....

English for children

Write the name of each geometric shape according to its characteristic.

It has 1 or 2 faces, 0 or 1 edges, and 1 apex (which is described by some mathematicians as a vertex).

It has either 2 or 3 faces, 0 or 2 edges, and 0 vertices.

It has 6 faces, 12 edges, and 8 vertices.
All sides are equal in length.
All faces are square in shape.
It is a type of cuboid.

It has 6 faces, 12 edges, and 8 vertices.
All the faces are rectangular

It has either 0 or 1 faces, 0 edges and 0 vertices.

It has infinite lines of symmetry.
