

A

$$1) \sin(A + B) = \quad 2) \cos(A - B) = \quad 3) \tan(A - B) =$$

B

$$= \cos A \cos B + \sin A \sin B$$

$$= \frac{\tan A - \tan B}{1 + \tan A \tan B}$$

$$= \sin A \cos B + \cos A \sin B$$
