

Bar Graph

The table below shows the **types** and **number of animals** on Farmer Brown's farm.

goats	cows	dogs	sheep	ducks
30	10	5	20	15

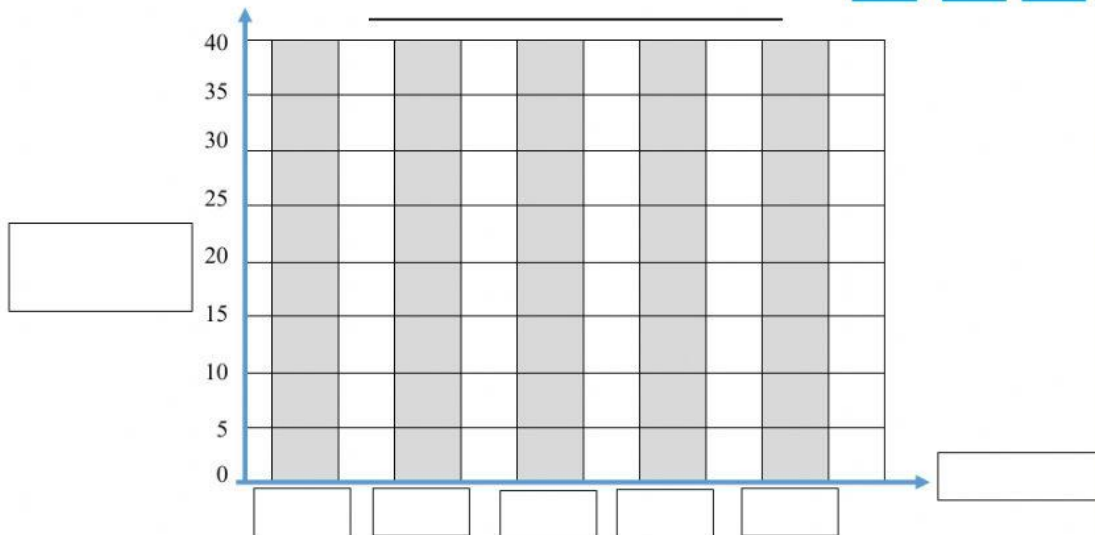

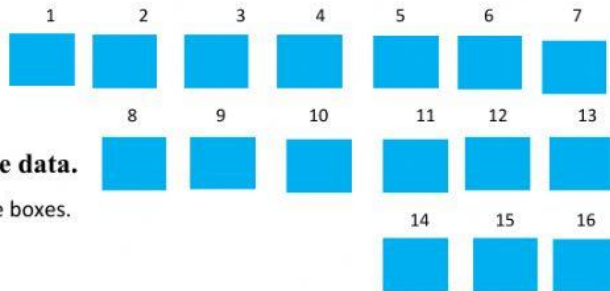

Use the table data to complete the bar graph to show the type and number of animals on Farmer Brown's farm.

1. Give the graph a title

2. Label both axis

3. Drag the boxes to graph the data.

Note: Use the numbering on the boxes.

Answer the following questions.

- Which type of animal would be found mostly on Farmer Brown's farm?
- Which type of animal was the least popular on Farmer Brown's farm?
- How many more goats did he have than sheep?
- How many dogs and ducks does he have in all?
- Farmer Brown wants to have the same number of sheep and goats. How many more sheep does he need to have so the numbers would be equal?
- The total number of ducks and dogs is equal to the number of sheep. Is that true or false?
- What is the total number of animals on Farmer Brown's farm?
