

Happy National Paperclip Day!
Let's do some math problems to celebrate!

1. How many paperclips do you see below?

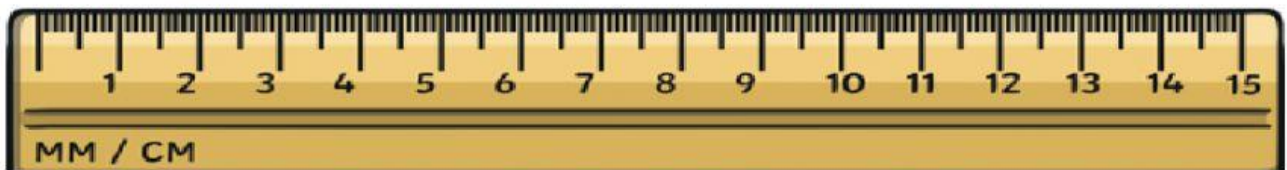

9

6

7

2. How long is this paperclip chain?

13 cm

10 cm

15 cm

3. I printed **100** copies of a notice. I have to group the notices into packets and paperclip them. Each packet must have **20** pages in it. How many paperclips will I need?

You can use a calculator:

$$100 \div 20 =$$

You can draw it out (5 stacks of 20 pages each):

100 paperclips

5 paperclips

20 paperclips
