Read and complete:

We can name three parts of the Earth:

· The Atmosphere: the atmosphere is the air that we breathe. It is the gaseous part of the Earth. The atmosphere is composed of nitrogen, oxygen and other gases. Living beings need oxygen to breathe and live.
The Hydrosphere:the hydrosphere refers to all of the water on our planet, it is the liquid part of the earth. Most water comes from oceans and seas and the rest is in lakes and rivers.

· The Geosphere: the geosphere is the solid part of the earth that is composed of rocks and metals. In the geosphere there are three layers: the Earth's crust, mantle and nucleus.
