

## **MATHEMATICS GRADE ONE**

### **STRAND: WHOLE NUMBERS**

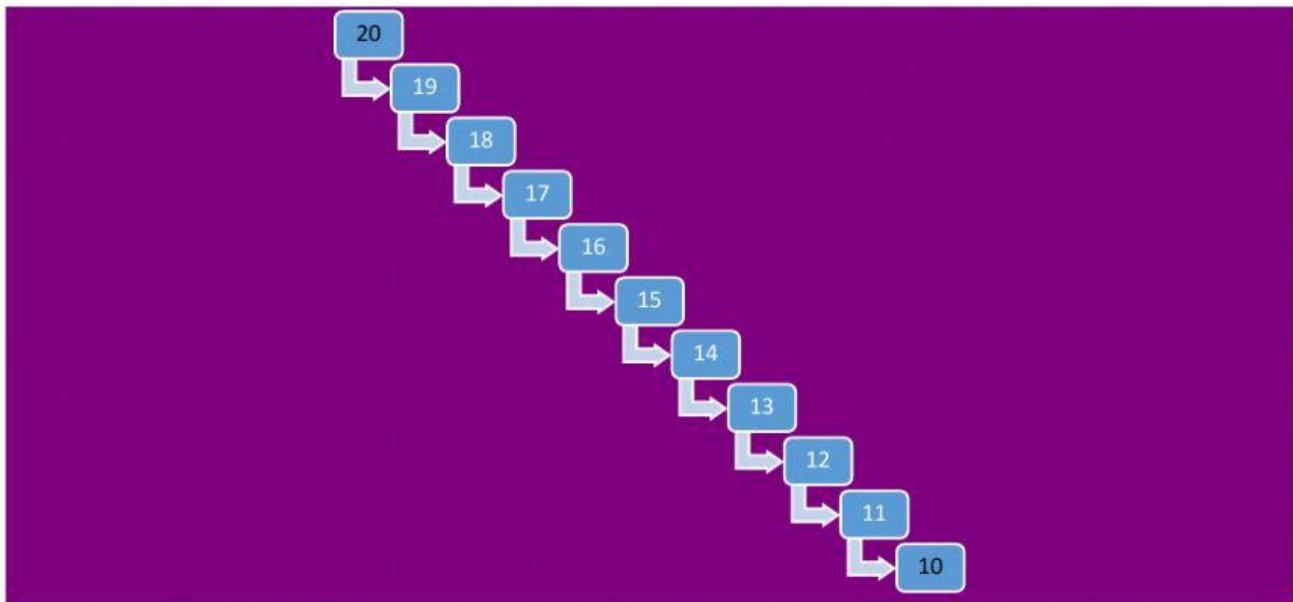

#### **SUB STRAND: SUBTRACTION BY COUNTING BACKWARDS**

**Introduction:** Today we are going to use the method known as counting backwards.

Do you remember how to count backwards?

Lets count back wards from 20 - 10

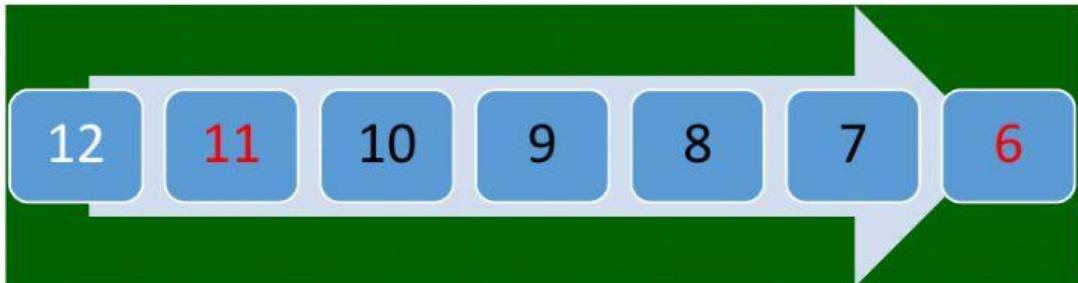

**Good work**

### EXAMPLE 1:

$$12 - 6 =$$

We start counting backwards from the next number before 12 that is 11

We count backward 6 times to the answer

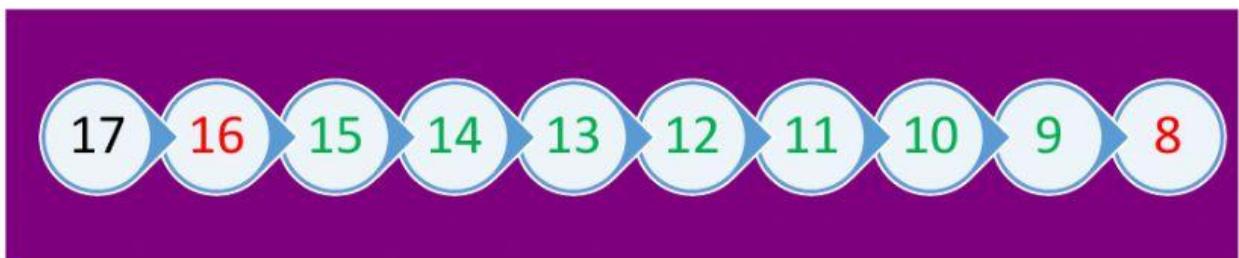

**The answer is 6**

**Activity: watch the video below on subtraction by counting backwards:**

### EXAMPLE 2:

$$17 - 9 =$$

**The answer is 8**

**EXERCISE:**

1.  $14 - 6 =$

6.  $11 - 6 =$

2.  $13 - 4 =$

7.  $11 - 5 =$

3.  $12 - 5 =$

8.  $10 - 8 =$

4.  $12 - 7 =$

5.  $15 - 7 =$
