

Els cossos geomètrics

1. Arrossega cada part al seu lloc corresponent:

- Base
- Cara lateral
- Arista lateral
- Vértice

- Base
- Cara lateral
- Arista bàsica
- Vértice

- Base
- Vértice
- Radio
- Superfície lateral

2. Posa el **número** corresponent a cada cas:

	Caras 	Vértices 	Aristas
Vértices + caras = aristas + 2			

	Cares 	Vèrtexs 	Arestes
Vèrtexs + cares = arestes + 2			

	Cares 	Vèrtexs 	Arestes
Vèrtexs + cares = arestes + 2			

	Cares 	Vèrtexs 	Arestes
Vèrtexs + cares = arestes + 2			

3. Calcula el volum i la capacitat de cada figura:

Volumen =

Capacitat =

Volumen =

Capacitat =

Volumen =

Capacitat =

Volumen =

Capacitat =

4. Relaciona cada figura amb les expressions del seu volum:

Volumen = 29

Volumen = 88

Volumen = 30

Volumen = 120

Volumen = 116

Volumen = 22

5. Calcula el volum de cada cos i escull l'opció correcte

10/10

6. Ordena de menor a major els metres cúbics; arrossegant el cartell corresponent al seu lloc:

26 cm³ 0,5 m³ 32 dm³ 5 m³ 6 dm³ 149 cm³
