

WRITTEN COMPREHENSION

The Bermuda Triangle

At 2 pm on 5 December 1945, five US bombers took off from Fort Lauderdale in the USA for a training flight in perfect weather. Shortly afterwards, the pilots radioed that their flight instruments were all malfunctioning. Two hours after take-off, all contact with the planes was lost. A reconnaissance plane was immediately dispatched to search for the missing planes. Within 20 minutes, radio contact with it had also been lost. No trace of any of the planes was ever found. In all, six planes and 27 men had vanished into thin air.

The disappearance of the six planes was far from being the first mysterious incident in the area: for years, navigational problems and strange magnetic forces had been reported.

The Cyclops, a 19,000-ton US ship was sailing from Barbados to Norfolk, Virginia in March 1918, it vanished with its crew of 309 from the surface of the ocean without making a distress call and was never seen again.

The losses of boats and planes in that area defy explanation so the Bermuda Triangle has entered legend. The Bermuda Triangle has been called the Devils' Triangle, the Triangle of Death, the Graveyard of the Atlantic. It has swallowed up 140 ships and planes and more than 1,000 people. Today many airmen and sailors are still afraid of that area of the Atlantic Ocean.
