My school

I. Read how different students describe their schools:

Michael: My school is located in the middle of the city, when driving by, it just looks like a large high school. It's set exactly in the middle of a residential area, but the building is very attractive and appealing to the eye. The famous St. Ignatius chapel can be seen from almost anywhere in the city. The school is clean, despite the current on-going construction, and on a school day, there are many students walking to and from class or their dorms. The re are big sport facilities and a municipal swimming-pool nearby.

Lora: Our college consists of unique friendly students, open and helpful teachers, and a comfortable environment that does not pressure but eases the minds of students to help them into their futurecareers.

Paige: For me it is a great opportunity to learn in an intimate environment, opportunity to be cultured in the international city, the opportunity to gain experience through many internships that the city has to offer, opportunity to experience great cuisine and diversity, and the chance to have a great college experience.

Jina: Difficult to study but you get as much out as you put you in. I like my spanish and art classes. I think my last internship was a very precious experience to feel the real professional routine.

Sandra: I think my school from the outside just looks like a great place to learn. I have found certain spots on campus that I really enjoy studying in. It is just a comfortable and great atmosphere to get an education. There are pianos in the rest areas on every floor, a big and cozy library with a helpful librarian. I enjoy spending hours with my study group fellows in the library study room.

Vincent: Socially diverse, it is an old school providing students with small classes, enthusiastic teachers, and a location situated in the highs of a small picturesque city - a fact which allows students from small villages exposure to a "real world" environment, easing young people into the world, fostering professionals for tomorrow.

II. Describe your school. Speak about its spirit and culture to someone who's never seen it. (Location, environment, subjects, what you particularly appreciate)

Use this plan:

1. Where do you study? (Name of your school)
2. Where is it located? (city, country, environment)
3. What do you study?(your future profession, how many years should you study, what subjects)
4. Describe your school spirit and culture (what is so special about your school? what do you like/dislike?)
5. Compare it with your previous schools.
