It has got a very important task because it guards the flower/leaf from any danger caused by wildlife.

LEAVES

It is the most essential part of a plant because it allows the plant to produce its own food thanks to chlorophyll and the sunlight.

FLOWER

It receives water and minerals from the soil. Without it, the plant could fall down or even die.

BUD

It is considered to be the most attractive part because it has got a lot of colours. This part makes insects to be interested on the plant.

STEM

This part helps the plant to stand up and distributes different minerals, food and water to the whole plant.

FRUIT

This part is created by the plant and is created by food and seeds. Sometimes you can eat it and sometimes not.
