

LIVEWORKSHEET #1

1._ Read the text.

Dear Ana,

The Galapagos Islands are located in Ecuador, a country in South America. In these islands there are lots of different animals like turtles, penguins, lizards, sea wolves, etc. I am going to visit the Galapagos Island for my biology class, I am really excited. I have heard the sea wolves are dangerous, so I am going to try to stay away from them. My friend Darwin lives in the Galapagos Islands, he is going to let me stay in his house. I am going to bring a gift for him. What do you think I should bring?

I'm waiting for your response.

With love,

Shaun.

1. Answer the next questions:
