What are materials like?

Read the text and answer

Objects are made of different materials like glass, wood, metal, plastic and fabric.

All materials have different properties. **Glass** is transparent and fragile, which means it breaks easily. **Wood** is resistant and rigid.

Metal objects don't break easily, but they can change shape. **Plastic** is resistant, flexible and often transparent. **Fabric** is flexible, resistant and sometimes elastic; this means you can stretch it by pulling it, but when you stop pulling it quickly it returns to its original shape.

Write the correct material under the images

Write the correct material under te images

Material

Wood
Plastic
Fabric
Metal
Glass

Properties

resistant flexible
transparent rigid fragile
change its form

Paper _____ is opaque _____

_____ is resistant and _____

_____ is resistant, _____ and sometimes _____

_____ is _____ and transparent

_____ is a material that can _____

_____ is _____, flexible and sometimes elastic
